

# VISHAL CHAVAN

Full-Stack Software Engineer | Node.js, Angular

chavanvd64@gmail.com • +91 9359240192 • LinkedIn • Pune, India

---

## Professional Summary

Full-Stack Software Engineer with 3+ years of experience designing and building scalable web applications using Node.js, Express.js, Angular, and PostgreSQL. Skilled across the full stack, from RESTful API design and database schema optimization to responsive UI development and cloud deployment on AWS (EC2, S3, RDS). Experience delivering a Generative AI feature using Azure AI Search and GPT-4, along with secure authentication, CI/CD pipelines, and Agile-based delivery. Background also includes Java, Spring Boot, and microservices from full-stack engineering training.

## Technical Skills

- **Languages:** JavaScript, TypeScript (working), Java, SQL
- **Backend:** Node.js, Express.js, REST APIs, Sequelize ORM, Spring Boot, Hibernate/JPA, Microservices
- **Frontend:** Angular, HTML5, CSS3, Responsive UI Development
- **Databases:** PostgreSQL, MySQL
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, CI/CD, Git
- **Security:** JWT-based Authentication & Authorization, Role-Based Access Control
- **AI / Other:** Generative AI Integration, Azure AI Search, GPT-4, Agile/Scrum

## Professional Experience

Senior Analyst / Software Engineer | Capgemini

Oct 2022 – Present

- Designed and developed **RESTful APIs** using **Node.js** and **Express.js**, and built corresponding user interfaces in **Angular**, enabling end-to-end feature delivery across the stack.
- Led full-stack development of scalable, interactive business solutions using **Node.js**, **Express.js**, **Sequelize ORM**, **PostgreSQL**, and **Angular**, reducing system downtime by 5%.
- Built a **Generative AI** solution using **Azure AI Search** and **GPT-4** for automated content generation, and integrated supporting push notification and email delivery features.
- Implemented secure authentication and authorization for application features, and worked extensively with **AWS S3** and **RDS** for file storage and managed database hosting.
- Improved deployment efficiency by 15% through streamlined **CI/CD** pipelines on **AWS**, reducing manual release effort.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment, contributing to sprint planning, code reviews, and iterative delivery of production features.

Java Full-Stack Engineer | Capgemini

- Developed **RESTful APIs** using **Java** and **Spring Boot**, integrating them with **MySQL** databases to support CRUD operations for core application modules.
- Built responsive user interfaces using **Angular**, integrating frontend modules with backend REST APIs, and applied **Hibernate/JPA** and **JDBC** for database access.
- Gained hands-on exposure to **Microservices** architecture and **Docker**, working within an Agile development environment.

## Key Project

Car Wash Booking & Management System — Full-Stack Web Application

- Architected and developed scalable **RESTful APIs** using **Node.js** and **Express.js**, enabling secure, efficient communication between the **Angular** frontend and backend services.
- Implemented **JWT-based authentication**, role-based access control, appointment scheduling, and core **CRUD** operations backed by a **PostgreSQL** database.
- Designed the database schema and optimized **SQL** queries, improving query performance and ensuring efficient, well-structured data management.
- Built responsive **Angular** interfaces with real-time data updates, and followed **Git**-based version control and **CI/CD** practices within an **Agile** workflow.

## Education

Bachelor of Engineering — VPKBIET, Baramati, Pune

July 2018 – July 2022

## Certifications

AWS Certified Cloud Practitioner

---
